- TARGET BIRD** Gull, pigeon or larger
- BIRD PRESSURE** Light - Medium
- MATERIAL** Stainless Steel and Delrin Plastic
- INSTALLATION** Delrin base is screwed to surface
- INSTALLATION LEVEL** Easy

A sea of Daddi Long Legs protect a roof near the ocean from hundreds of gulls.

Three Daddi Long Legs protect these box lights on a large parking structure.

An eight foot Daddi Long Legs with magnetic base protects this large HVAC unit.

Easy to Install

The Delrin (plastic) base can be screwed into most surfaces and comes with a 1/4" adhesive neoprene gasket. A PVC base adapter is available for glue-on applications. When placed together in groups, overlap the tips 4 - 6 inches.

How it Works

Thin, stainless steel rods rotate in the breeze and wave menacingly, interfering with birds' wings as they attempt to land.

Removable

The center spindle can be easily separated from the base to access the area it is protecting.

Hard to See

The Daddi Long Legs is inconspicuous from short distances and practically invisible from afar. Its unobtrusive design allows for use in even high visibility areas like shopping/walking promenades and parking lots.

Humane

The waving rods have plastic tips to prevent injury to birds or humans.

Boat Railing Mount	DD-B115	
140 lb. Magnet Base	DD-B140	827619

Mounting Daddi Long Legs

Boat Railing Mount: When birds consider your boat's railing a perfect perch, attach a Daddi Long Legs with our boat railing mount.

Boat Base: This Lexan adapter attaches to the Daddi Long Legs base. It attaches to your boat with a bungee cord or rope.

Sandbag Base: The weighted sandbag base can be used in areas where the standard boat base is not appropriate.

Magnetic Base: Magnets stick best to thicker metal. These magnets have not been wind tunnel tested. Exercise caution when using. Daddi Long Legs should be secured with a safety tether of some sort when magnets are used. Caution, many parking lot lights are actually made from aluminum which is not magnetic. Magnets stick best to flat surfaces, use caution on curved surfaces.

New Base!

Now, Daddi Long Legs can be glued directly to the surface, a PVC base is no longer necessary. Make sure glue comes up through all the screw holes.
